

DOXIMITY WORKPLACE NAVIGATOR TOP HOSPITALS FOR DOCTORS METHODOLOGY

December 5, 2022

Data

Doximity's Top Hospitals for Doctors state ranking is based on reviews data submitted by eligible survey takers. Eligible survey takers 1) are verified Doximity members, 2) have MD or DO credentials, and 3) currently work at the reviewed hospital or have worked at the reviewed hospital within the last 10 years. The survey asks participants to provide a rating from 1-5 on the following dimensions: overall satisfaction, hospital culture, schedule flexibility, and support staff.

Physicians must be verified and logged into their Doximity accounts to access the survey:

https://www.doximity.com/surveys/workplace_reviews.

Methodology

The Top Hospitals for Doctors state ranking is updated at least annually. Reviews submitted from the last ten years are pooled annually to determine rankings, which are calculated by a combination of factors such as:

- Average ratings across overall satisfaction with the work experience, culture, schedule flexibility, and support staff
- Total number of verified reviews
- Recency of ratings and reviews

Hospitals need to have at least 3 reviews to be considered for the Top Hospitals for Doctors state ranking. As of Dec 2022, 1,200 hospitals met the minimum criteria, while 172 hospitals scored in the top 25th percentile and were ranked and recognized as Top Hospitals for Doctors in their respective states.
